

Fluid Projects has an exciting opportunity for a **Field Technologist/Engineer** ready to:

- Be a key part of a growing team of multi-disciplinary professionals
- Build genuine relationships with co-workers, clients and stakeholders
- Be mentored and mentor others
- Thrive in a supportive environment with high expectations for quality and technical excellence
- Challenge your critical thinking skills
- Work in an inclusive, positive and flexible atmosphere that supports today's varied lifestyles

If this sounds like you, we want you on our team!

Fluid Projects is a consultancy based in Calgary, AB that focuses on finding practical solutions to water challenges in the Energy Industry. We invest in relationships first which enables us to work collaboratively with clients to navigate the complex and ever-changing landscape surrounding the permitting, storage, reuse, and disposal of water and wastewater.

As a member within our dynamic company, **RESPONSIBILITIES** will include:

- Supporting civil, geotechnical and environmental projects in the field
- Performing on-site construction quality assurance and quality control (QA/QC) supervision, including soil compaction testing using a nuclear densiometer
- Geotechnical/hydrogeological drilling program supervision
- Communicating and coordinating with contractors in the field during construction projects
- Developing and maintaining excellent relationships with clients
- Supporting on Dam inspection and reporting projects
- Reporting and compiling data from field investigations
- Adhering to company operational and safety procedures, policies and standards

REQUIREMENTS

- Possession of a Degree/Diploma in Civil/Geotechnical Engineering or Technology, or an equivalent combination of education and field experience
- Previous experience as a field technologist or similar role
- Sound understanding of the need for health and safety procedures in the workplace and possess a safety conscious attitude
- Physically able to perform field work as required
- Role is primarily field-based and requires travel
- Excellent written and oral communication skills
- Possess a Class 5 Driver's License and legally authorized to work in Canada

If you are up for the challenge to join our growing team, please submit applications to info@fluidprojectsinc.ca by February 27, 2024.

We appreciate all applications, however only individuals selected for interview will be contacted.
